

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

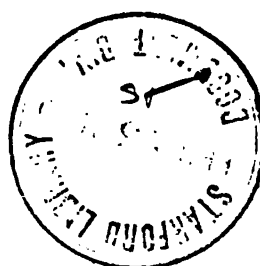

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

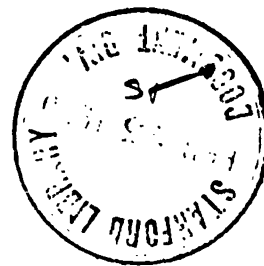

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., May 13, 1919.

SIR:

I transmit herewith a statistical directory of state institutions for the care of the defective, dependent, and delinquent classes. This publication was planned by Dr. H. H. Laughlin, Superintendent of the Eugenics Record Office, Cold Spring Harbor, N. Y., who as special agent of the Bureau of the Census had charge of the collection of the data. The data were tabulated and the volume prepared in the Division of Revision and Results in this Bureau under the charge of Dr. Joseph A. Hill, assisted by Reginald L. Brown.

While in general the returns here published relate to January 1, 1916, or to the year 1915, it should be noted that the name and location of the institution and also the name of the chief executive officer and the facts regarding the controlling body represent conditions on March 1, 1919, or later, the original returns having been verified and revised through correspondence with a view to bringing this information as nearly up to date as practicable.

The publication here submitted was projected and partially completed before the United States entered the war; and its further progress and final completion have been in some degree delayed by conditions in this Bureau arising out of the war. It is believed, however, that in these times when, as a consequence of the war, the country in all probability is entering upon a period of social readjustment in which the problems associated with poverty, crime, and disability will demand more attention than ever before, this volume listing and describing the institutions established by the states for the care of the defective, dependent, and delinquent classes may have a greater usefulness than was anticipated when the work was originally projected.

Respectfully,

SAM. L. ROGERS,
Director of the Census.

To Hon. WILLIAM C. REDFIELD,
Secretary of Commerce.

STATISTICAL DIRECTORY OF STATE INSTITUTIONS FOR THE DEFECTIVE, DEPENDENT, AND DELINQUENT CLASSES.

INTRODUCTION.

The class of institutions for which statistical and other descriptive data are published in this volume was defined to include any institution in operation on January 1, 1916, owned or leased, managed in whole or in part, and maintained to the extent of at least 50 per cent of its annual expenditures by the state or Federal government and devoted to the custodial or other continuous care of persons belonging to one or more of the following classes: (1) Feeble-minded; (2) Insane; (3) Criminalistic (including the delinquent and wayward); (4) Epileptic; (5) Inebriate (including drug habitues); (6) Tuberculous (or others with chronic infectious segregated diseases); (7) Blind; (8) Deaf; (9) Deformed; and (10) Dependent.

The number of such institutions, the total number of inmates, the total value of plants, and the total expenditures are shown for each class of institutions in the following table:

CLASS OF INSTITUTION.	Number of institutions in operation Jan. 1, 1916.	Number of inmates, patients, or pupils, Jan. 1, 1916.	Value of plants, Jan. 1, 1916.	Expenditures for maintenance and operation in 1915.

Blind, deaf, and dependent.....	1	215	200, 000	59, 649. 67

In addition to giving details for those institutions which were in actual operation on January 1, 1916, reference is made to any institutions which were in the making on that date, the number of such institutions being about 30, and also to any which have since been provided for. The presentation for each state includes a map showing the location of the several institutions for the defective, dependent, and delinquent classes, a table giving general statistics for the state and indicating its rank as regards population, wealth, industries, literacy, etc., a classified list of institutions, and a statistical summary followed, in another section of the volume, by a detailed statement regarding each institution.

¹³ Not reported separately.

¹⁴ Less than 1 cent.

¹⁵ In computing this average, it has been assumed that the average number of inmates per month is equal to the mean between the number at the beginning and at the end of the year. As the number at the beginning of the year was not reported, it has further been assumed that this would be equal to the number at the end of the year minus the number of admissions during the year and plus the number of losses during the year. The average expenditures per month will be one-twelfth of the total reported expenditures for the year; and this figure has been divided by the average number of inmates per month, obtained as above described, the result representing the average expenditures per inmate per month.

¹⁶ Exclusive of seven institutions.

¹⁷ Data not available.

¹⁸ Exclusive of four institutions, but including "Other employees" for one institution.

¹⁹ Includes "Attendants, guards, nurses, etc.," for one institution.

²⁰ Exclusive of two institutions, but including "Attendants, guards, nurses, etc.," for three institutions.

1 Computed according to the method described on page 9.

2 Average not shown by reason of the number of institutions which failed to report admissions.

3 Data not available.

4 As these institutions were in operation for only part of the year, the data were insufficient for computing an average.

5 As institution was not opened until December, 1915, no data are presented for annual expenditures.

6 Exclusive of one institution, which was in operation for only part of the year.

7 Exclusive of one institution, for which data are not available.

8 As institution was not opened until May, 1915, the data were insufficient for computing an average.

9 Exclusive of two institutions, for which data are not available.

¹ The two institutions for the tuberculous were not opened until the latter part of 1915, one being in operation only three months and the other only four. The figures for annual appropriations and expenditures represent for one institution four and for the other three times the amount reported for the period actually in operation.

² Exclusive of institutions for the tuberculous.

³ As these institutions were in operation for only part of the year, the data were insufficient for computing an average.

* For significance of the symbols following names of institutions, see p. 35.

1 Computed according to the method described on p. 9.

2 Established in 1821 and opened in 1822 as the Indiana State Prison.

3 Originally combined with the Indiana Woman's Prison.

4 Institution in operation for eight and one-half months during 1915. Figures for state appropriation represent twice the amount appropriated for the support and maintenance of this institution for the period from Apr. 12 to Sept. 30, 1915, and figures for expenditures twice the amount expended during this period.

5 Based on per capita cost of maintenance for period from Apr. 12 to Sept. 30, 1915, as shown in report of State Board of Charities and Corrections.

6 Average for the year 1915.

¹⁰ Senate may reject nomination of governor and elect to fill the vacancy.¹¹ Not reported separately.¹² Figures for the State Farm, upon which the Workhouse and House of Correction and the State Infirmary are located, and from the appropriation for which they receive their financial support and maintenance.¹³ Figures for the State Infirmary included in those shown for the Workhouse and House of Correction.¹⁴ Institution not established until 1918.¹⁵ Institution in operation only about seven months during 1915. Figure for expenditures represents one and five-sevenths times the amount expended during the period actually in operation.¹⁶ As institution was in operation for only part of the year, the data were insufficient for computing an average.

¹⁰ One-half of appropriation for biennial period 1913-15.

¹¹ One-half of expenditures for biennial period 1913-15.

¹² Figures relate to the fiscal year ending in 1916.

¹³ Fiscal year for appropriations ends Mar. 31; that for expenditures Dec. 31.

¹⁴ Data not available.

¹⁵ Figures relate to July 1, 1915.

¹⁶ Not a state institution in 1916.

¹⁷ Institution in operation only four and one-half months during 1915. Figures represent two and two-thirds times the amount expended during the period actually in operation.

¹⁸ As institution was in operation for only part of the year, the data were insufficient for computing an average.

¹⁹ One-half of appropriation for biennial period 1914-16.

²⁰ One-half of expenditures for biennial period 1914-16.
